EXECUTIVE PROFILE

Senior IT infrastructure and cybersecurity leader with 25+ years of progressive experience — including 17+ years in Qatar — designing, securing, and modernizing enterprise technology environments across healthcare, financial services, manufacturing, and trading sectors. Combines board-level technology strategy with deep hands-on expertise in Microsoft enterprise platforms, cybersecurity, networking, virtualization, cloud, and disaster recovery. Delivered 30+ major infrastructure and consulting engagements end to end, from architecture and planning through implementation and operational support, while managing budgets and vendor portfolios of up to QAR 2 million.

CAREER HIGHLIGHTS

- Directed enterprise IT for a multi-site healthcare group for 16+ years, sustaining mission-critical clinical and business operations while driving continuous modernization.
- Architected and delivered complete multi-site IT environments — servers, networking, security, virtualization, backup, and DR — for organizations of up to seven locations.
- Played key technology roles in JCI accreditation, Qatar eHealth onboarding, National Health Insurance inclusion, and hospital management system (HMS) initiatives.
- Built and led IT teams of up to 21 professionals in India and 7 in Qatar, covering recruitment, technical evaluation, mentoring, and staff development.
- Strengthened security posture across client environments with next-generation firewalls, EDR/XDR, hardening, monitoring, and tested disaster recovery plans.
- Recipient of three Microsoft recognition/excellence awards and two employer excellence awards.

CORE COMPETENCIES

Enterprise IT Strategy & Architecture • Cybersecurity & Network Security • Infrastructure Modernization • Cloud & Hybrid Infrastructure • Business Continuity & Disaster Recovery • Microsoft Enterprise Technologies • IT Operations & Service Delivery • Vendor & Contract Management • Budgeting & Cost Optimization • Team Leadership & Mentoring • Healthcare Technology & Compliance • Infrastructure Automation & Monitoring

PROFESSIONAL EXPERIENCE

IT Manager

Dec 2009 – Present

Al-Hayat Medical Center Group | Doha, Qatar

- Lead enterprise IT strategy and operations for a mission-critical, multi-site healthcare environment, aligning infrastructure, security, and modernization with clinical and business priorities.
- Architect and operate the full Microsoft enterprise stack — Windows Server, Active Directory, Microsoft 365, Hyper-V — alongside networking, storage, backup, endpoint security, and cloud-connected services.
- Strengthened cybersecurity and resilience through next-generation firewalls, EDR, security hardening, controlled remote access, continuous monitoring, and disaster recovery planning.
- Planned and delivered infrastructure modernization, consolidation, and migration programs that improved availability, scalability, and long-term sustainability.
- Advise executive management on technology investment, infrastructure risk, vendor selection, and business continuity; manage budgets and initiatives up to approximately QAR 2 million.
- Own IT service delivery end to end: user support, incident escalation, asset and documentation management, procurement, AMC renewals, and SLA follow-up with vendors.
- Served as a key technology contributor to JCI accreditation, Qatar eHealth onboarding, National Health Insurance inclusion, and HMS-related programs.
- Recruited, mentored, and led teams of up to 7 IT professionals; introduced infrastructure automation and operational visibility using Ansible, Python, Wazuh, and GLPI.

Independent Enterprise Technology Consultant (Concurrent, Part-Time)

2010 – Present

Self-Employed | Qatar

- Delivered 30+ major infrastructure and consulting engagements across healthcare, financial services, manufacturing, and trading sectors, alongside primary employment.
- Delivered end-to-end IT infrastructure for a five-branch healthcare organization: enterprise networking, Microsoft platforms, cybersecurity, virtualization, backup, and resilience planning.
- Provided Microsoft infrastructure architecture and technical planning for a private hospital data center project (~QAR 2 million), including network planning and HMS implementation coordination.
- Designed and standardized Microsoft enterprise infrastructure for a seven-location healthcare organization, focusing on centralized services, reliability, and operational consistency.
- Designed secure infrastructure for financial services and money exchange environments with emphasis on security, availability, and controlled operations.
- Advised leadership teams on infrastructure strategy, cybersecurity, modernization, DR, and IT staffing; supported technical interviews and recruitment. Client references available upon request.

Senior Technical Support Engineer — Microsoft US/Canada Process

Oct 2005 – Dec 2008

Aditya Birla Minacs | Bangalore, India

- Provided Tier-3 support for Microsoft server, messaging, OS, and connectivity issues to enterprise customers across the US and Canada.
- Earned three Microsoft recognition/excellence awards for technical performance and service quality.

Technical Trainer

Aug 2003 – Sep 2005

Indian Institute of Hardware Technology (IIHT) | Bangalore, India

- Delivered classroom and hands-on lab training in networking, operating systems, Microsoft technologies, and system administration; mentored students toward industry certifications.

System Administrator

Feb 2001 – Aug 2003

Transit Infotainment Pvt. Ltd. | Kochi, India

- Administered network, server, and end-user computing environments; implemented data protection, access control, and support processes.

TECHNOLOGY PORTFOLIO

- Microsoft: Windows Server 2000–2025, Active Directory, Microsoft 365, Exchange, Hyper-V, Azure
- Infrastructure & Cloud: VMware, Azure, AWS, GCP, virtualization, storage, server consolidation, hybrid infrastructure
- Security: Palo Alto, Check Point, Fortinet/FortiGate, SonicWall, EDR/XDR, endpoint protection, security hardening
- Networking: Cisco Catalyst, Aruba, HP, Extreme Networks, Ubiquiti, VLAN, VPN, WAN, routing & switching
- Automation & Monitoring: PowerShell, Python, Ansible, Wazuh, GLPI, SolarWinds, Wireshark, Auvik
- Backup & DR: Rubrik, Acronis, Veritas Backup Exec, disaster recovery, business continuity

EDUCATION & CERTIFICATIONS

- Bachelor of Commerce (B.Com.) — University of Calicut, India
- 3-Year Diploma in Software Engineering — Aptech Computer Education (C, C++, Java, SQL, HTML)
- 2-Year Advanced Infrastructure & Networking Program — IIHT, Bangalore (A+, Network+, MCSE, CCNA, RHCE, UNIX/Solaris curriculum)
- Cisco Certified Network Associate (CCNA) | Microsoft Certified Solutions Associate (MCSA – Messaging)
